BISON BAG - 45.0KG

99^{LB}

45^{KG}

MAX LOAD:

Loaded with features, the Bison Bag provides a comprehensive solution to tool management, transportation and tethering for working at height. Tether anchors inside and outside the bag keep tools secure and accessible, and an extra heavy-duty drawstring webbing keeps contents secured against spills and drops.

Built for harsh industrial environments, the Bison Bag protects against punctures with a composite insert built right into the base of the bucket. A fully load rated lifting strap allows for easy transportation of the Bison Bag to the work area.

THE LEADER IN FALLING OBJECT PREVENTION

GRIPPS.COM

KEY FEATURES

Zip seal enclosure to protect against drops.

Multiple inner pockets for comprehensive tool organisation

Multiple internal and external tether anchors

Extra heavy-duty webbing for longlasting survival in the harshest of construction environments

Puncture-proof composite insert in the bucket base.

HOW TO USE

1

To secure contents inside the Bison Bag, pull the drawstring tight.

2

Only lift from the clearly identified load-rated lifting point on the straps, and ensure tools are tethered to the D-Rings at all times. Do not lift from carabiner.

*** NEVER EXCEED MAX LOAD ***
