H01135 LOCKJAW CLIMBERS BAG - 10.0KG

Robust, lightweight and packed with tether anchor points, GRIPPS® Lockjaw Climbers Bag keeps tools tethered and accessible whether they're inside or outside of the bag.

A zip closure keeps contents safe and secure during transportation, while an in-built lockjaw mechanism holds the top open and the contents accessible when on the job.

With heavy-duty tether anchors inside and outside the bag, your tools can remain tethered during all job stages. Inner sleeves keep tools organized inside the bag.

22 LB **10** KG
MAX LOAD:

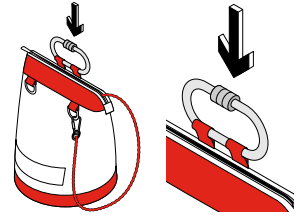

THE LEADER IN FALLING OBJECT PREVENTION

KEY FEATURES

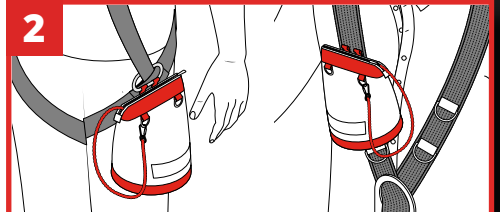

1

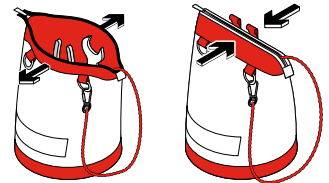

To connect a Lockjaw Climbers Bag for personal use, feed a carabiner through either the upper or lower set of loops.

2

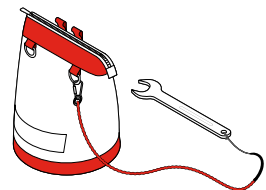

Connect the carabiner to an appropriate anchor point on the harness.

3

To operate the metal-snap mechanism, pull the opening apart and the closure will automatically spring open and lock into place.

4

Ensure that the closure is zipped closed when not in use to prevent spills. Only tether via the dedicated D-Rings.

*** NEVER EXCEED MAX LOAD ***
