H01056 SINGLE ARM TOOL HITCH 16KG | 35LB

Suitable for 'open' or 'closed' power tools, the Single Arm Tool-Hitch has a simple choking mechanism that creates a secure and robust tool connection point.

For 'closed' tools, such as a power saw, the Single Arm Tool-Hitch can loop through itself to create a choke.

For 'open' tools, such as a power drill, the Single Arm Tool-Hitch is secured against sliding up or down the handle by securing the single-arm with V-Gripp Tape.

KEY FEATURES

Secure single arm to tool with V-Gripp tape to prevent sliding

Creates a load rated tool connection point for both 'open' & 'closed' tools.

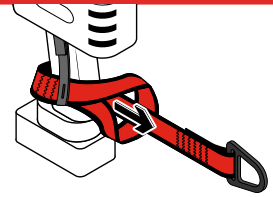

Tactical grade nylon for maximum strength

SPECIFICATIONS

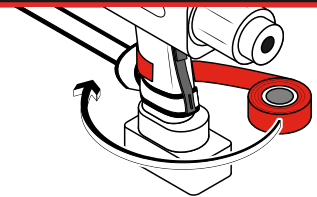

SKU	MAX LOAD
H01056	16KG 35LBS

1

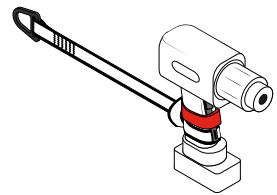

Pass one end of the Tool Hitch around the neck (near tool's center of gravity). Then pass the D-Ring end back through the Tool Hitch loop to create a choke-hold.

2

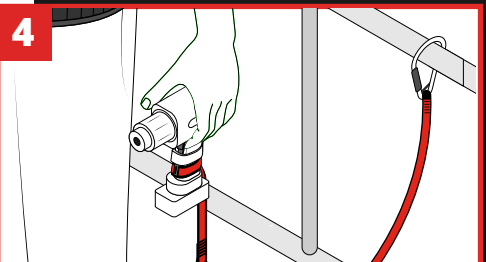

Apply GRIPPS® V-Gripp Tape to strap/wing of the Tool Hitch. Wrap around 10x times, avoiding the trigger.

3

Test tape effectiveness and pull on Tool Hitch to test strength.

4

Your Tool Hitch is ready to tether to a suitable anchor point using an appropriate Tool Tether.
