PÀCFIRE

PRODUCT CATALOGUE

ABOUT US

Pac Fire was established in 2000 with the founding vision of supplying the highest quality Personal Protective Equipment & Clothing (PPE/C) to Australia's emergency services.

This core motivation has led Pac Fire to represent the standard for excellence in the PPE/C industry. Pac Fire's success is closely tied to two fundamental principles of dependable quality and exceptional performance.

Over the years, Pac Fire's range has grown to include over 500 individual products sourced from iconic brands such as Pacific Helmets, Bristol Uniforms, Icebreaker, Kappler, Kestrel, BlowHard, OSW, Pok, Underwater Kinetics, Adaro, YDS, Meret, Responder Wipes, SC Products and more.

In a continuing commitment to protecting responder health and well being, and ensuring longevity of PPE/C, Pac Fire established PAC+CARE in early 2018. This flexible managed service utilises the latest in laundering technology and includes a state of the art filtration system ensuring contaminants removed from clothing and equipment whilst protecting the environment.

Today, Pac Fire has distribution centres located on Queensland's Gold Coast, Kurralta Park, Adelaide and Whanganui on New Zealand's North Island. These distribution points in combination with comprehensive sales representation, deliver paramount customer service to the Australasian region.

Whilst the business has grown, the tradition of providing emergency service workers with the highest quality protective clothing and equipment is maintained.

HELMETS & Accessories

PACIFIC HELMETS

In 1980, Pacific Helmets was established as a manufacturer of quality Motorcycle Helmets based in Whanganui on the North Island of New Zealand. In 1984, the focus of the Company began to shift in line with the development of the F2 Structural Firefighting Helmet and its inception into the New Zealand Firefighting Service.

Over the years that followed the development of the F2, Pacific Helmets has gained certification from all reputable safety standards organisations globally.

Pacific Helmets now specialises in manufacturing and exporting safety helmet products that balance paramount protection with design functionality and wearer comfort.

Flexible manufacturing processes and an innovative design team allow Pacific Helmets to offer customers the ability to customise helmets to suit their exact requirements and preferences.

Today, Pacific's range exceeds 100 individual helmet models with thousands of options for customisation to meet both individuals and services needs.

ACHIEVEMENTS & MILESTONES

- 1980 Pacific Helmets was founded and began selling Motorcycle Helmets to the Australasian market
- 1984 With the development of the Pacific F2, Pacific Helmets tenders for, and wins, the supply of Structural Firefighting Helmets into the New Zealand Fire Service
- 1986 Pacific Helmets start to manufacture Bicycle Helmets ahead of law being passed in 1994 to make them compulsory in New Zealand
- 1990 Awarded the tender for supply of Structural Firefighting Helmets for London Fire Brigade with the Pacific F3. A win which would spark a major take up of the Pacific Helmets brand across England and the greater United Kingdom.
- 1993 Following the adoption of the F3 by the London Fire Brigade, Pacific Helmets were awarded the supply of Structural Firefighting Helmets for Hong Kong Fire Department
- 1995 Pacific Helmets starts supplying helmets to the British Ambulance Service including Northern Ireland

- 1997 Most metropolitan and some country Fire Services across Australia start purchasing Pacific Structural and Wildland helmets
- 2000 A specialised range of rescue helmets is developed and launched including the R7 and R5 which is still one of the most popular rescue helmets on the market today
- 2000 The Australian SES adopts the new Pacific R5 Rescue Helmet. The R5 is still the helmet of choice for the SES today, 18 years later
- 2008 Revolutionary OTEP™ (One Touch Eye Protector) developed by Pacific Helmets for introduction into selected Structural Firefighting Helmets
- 2015 Pacific Helmets wins the SILVER award at the Best Design Awards (NZ) for the F10 Mk5 Structural Firefighting Helmet
- 2015 After years of research and development the Pacific F15 is released, creating industry excitement
- 2016 Pacific Helmets wins the GOLD award at the Best Design Awards (NZ) for the R6R Rescue Helmet

- 2017 Pacific Helmets wins the SILVER award at the Best Design Awards (NZ) for the F15 Structural Firefighting Helmet
- 2017 A revolution in water safety is developed by Pacific Helmets. The R6V MkII 'Seeker', designed specifically for water rescue and water recreation is released
- 2018 Pacific Helmets is nominated for the 'International Achievement of the Year' award, which has come as a result of the establishment of distribution networks in China, and opening an office in the Netherlands

HELMET FEATURES

- 1 DuPont™ Kevlar® & fibreglass reinforced composite shell
- 2 Advanced polymer chassis
- 3 GEN2 full cranium polyurethane impact liner
- 4 6-point Ribbon suspension system with padded air mesh
- 5 4-point Nomex® chin strap with leather cheek padding
- 6 Quick release buckle
- 7 Flame resistant Nomex® neck protector
- 8 Pacific ratchet adjustable headband with pivot nape strap
- 9 Dual pivot face shield
- 10 OTEP™ (One Touch Eye Protector)

- 11 Reflective trim
- 12 Two Easi On-Off Bases for torches (EOB)
- 13 Hands-free comms bracket
- 14 Rear storage hanger
- 15 Front plinth with reflectors
- 16 Adapter plates

PACIFIC F15 STRUCTURAL FIREFIGHTING HELMET

The next generation in structural firefighting helmets is available from Pac Fire.

The Pacific Helmets F15 is the perfect combination of safety, comfort and quality protection.

Manufactured from the unique DuPont[™] Kevlar[®] and fibreglass composite shell that has made Pacific Helmets synonymous with fire and rescue helmets.

This jet style design helmet is compatible with modern comms equipment and the clear face shield can be completely deployed over all major breathing apparatus masks.

OTEP™ (ONE TOUCH EYE PROTECTOR)

PACIFIC F11 DRAGONFLY

The Pacific F11 offers a fresh take on structural firefighting helmet design. The F11 has been designed to maximise protection and practicality for the diverse range of duties modern Emergency Service personnel are called on to perform.

- DuPont[™] Kevlar[®] & fibreglass reinforced composite shell
- Accentuated shell lines
- Easi On-Off Base for torch (EOB)
- Earmuff brackets
- Premium reflective trim
- GEN2 full cranium polyurethane impact liner
- Clear, clip on face shield
- Pull-down internal eye protection
- 4-point chin strap with leather cheek padding

- Pacific quick release buckle
- Rear storage hanger
- Flame resistant Nomex® neck protector
- Pacific ratchet adjustable headband with pivot nape strap
- 6-point ribbon cradle harness with padded air mesh

PACIFIC BR9 STANDARD

The BR9 from Pacific Helmets is a popular lightweight bushfire helmet. The standard shape incorporates a narrow side brim and multiple crown ridges allow for extra strength and air flow.

- DuPont[™] Kevlar[®] & fibreglass reinforced composite shell
- Multi-ridge impact protection
- Standard brim design
- Easi On-Off Base for torch (EOB)
- Earmuff brackets
- Goggle mount
- Premium reflective trim
- Clear, clip on face shield
- 3-point chin strap

- Pacific quick release buckle
- Flame resistant neck protector
- Pacific ratchet adjustable headband
- 6-point ribbon cradle harness with mesh
- Reflective trim not shown in image must be fitted for Type 3 certification

PRODUCT SPECIFICATIONS		
Product Code	HBR9SCVMF	
Application	Wildland Firefighting Technical Rescue Industry Work	
Certification	AS/NZS1801:1997 ^Type 3	

PACIFIC BR9 CAP STYLE

The BR9 is a versatile head protection platform for Emergency Services that can support a full range of accessories. The Cap Style Shell design has a short front brim, no rear brim and a scallop cut on both sides for better earmuff mounting and stowage.

- DuPont[™] Kevlar[®] & fibreglass reinforced composite shell
- Multi-ridge impact protection
- Cap style design
- Easi On-Off Base for torch (EOB)
- Earmuff brackets
- Premium reflective trim
- Clear, clip on face shield
- 3-point chin strap
- Pacific quick release buckle
- Flame resistant neck protector
- Pacific ratchet adjustable headband
- 6-point ribbon cradle harness with mesh

PACIFIC BR9 WIDE BRIM

All the features of the popular standard BR9 with the addition of a wider brim over the sides of the helmet. The wider brim offers more protection to the side of the head while also directing water and precipitation away from the neck.

- DuPont[™] Kevlar[®] & fibreglass reinforced composite shell
- Multi-ridge impact protection
- Wider brim over the sides of the helmet
- Easi On-Off Base for torch (EOB)
- Earmuff brackets
- Premium reflective trim
- Clear, clip on face shield
- 3-point chin strap
- Pacific quick release buckle
- Flame resistant neck protector
- Pacific ratchet adjustable headband

PACIFIC R6V MKII WATER RESCUE HELMET

The R6V MkII Seeker from Pacific Helmets has been designed specifically for water rescue and water recreation applications.

Made with a Fibretuff composite shell the Seeker provides integral strength and excellent penetration protection. This lightweight shell is chemical and UV resistant with inherent heat and flame resistance.

The specialised ventilation system can be opened and closed depending on the situation - when closed the vent is sealed, water tight.

PACIFIC R6 CHALLENGER

Contemporary design meets function - the Challenger rescue helmet is the definition of 'multi-purpose'. It is fully certified to the widest range of rescue helmet standards available and offers optimum protection for both wildland firefighting and technical rescue applications.

- DuPont™ Kevlar® & fibreglass reinforced composite shell
- Easi On-Off Base for torch
- Earmuff brackets
- Goggle mount
- Premium reflective trim
- Unique polyurethane cap
- Shock absorbing ultrastop padding
- Clear, clip on face shield
- 4-point chin strap
- Pacific low profile buckle
- Flame resistant neck protector
- Pacific ratchet adjustable headband
- 6-point ribbon cradle harness with air mesh

LED TORCH ADARO L5 PLUS

L5 Plus torch is multifunctional flashlight that can be used both as a hand torch or helmet mounted.

- Two power settings: high & Auto
- White LED with a 4 hour (high) burn
- Light output 135lm
- Photoluminescent bezel increases visibility
- Durable and impact resistant thermoplastic resin torch body
- Intelligent energy management
- 4 x AAA Alkaline batteries (L.5PLUS.S) or a 3.7v Li-ion battery (L.5PLUS.R)
- Can be mounted on any Pacific helmet using the A107118 Helmet Clip (sold separately)
- Charger for L.5PLUS.R sold separately (CL5.1)
- Made in Spain

PRODUCT SPECIFICATIONS		
Product Code	L.SPLUS	
Options	L.5PLUS.S - 4 x AA Batteries L.5PLUS.R - Rechargeable	
Certification	ATEX Zone O Intrinsically Safe Ingress protection IP67	

LED TORCH ADARO L1 PENLIGHT

The L1 is a multi-purpose hand and helmet LED flashlight that includes a universal helmet adapter. The built-in neodymium magnet enables the L1 to attach the torch to any metallic surfaces.

- White LED with an 18 hour burn
- Light output 100lm
- Shock resistant rubber casing
- Integrated neodyminum magnet
- Antistatic protection
- Chemical resistant
- Powered by 2 x AAA Alkaline Batteries
- Can be mounted on any helmet or hard hat using clip mount (included)
- Made in Spain

ELED TORCH 3AA CPO UNDERWATER KINETICS

Smaller. Lighter. Brighter. The 3AA eLED from Underwater Kinetics is a flashlight with superior LED technology that is lightweight and affordable.

- eLED with a 8 hour burn
- Light output 110lm
- Beam distance 92m
- Depth rating 3.05m
- Compound Path Optics (CPO) technology improves visibility and efficiency especially in poor visibility conditions
- Push button tail switch, switches light between ON/OFF with continuous or momentary action
- Powered by 3 x AA / LR6 Alkaline Batteries (included)
- Can be mounted on any Pacific helmet using the B2066114 Helmet Clip (sold separately)
- Made in the USA

PRODUCT SPECIFICATIONS

Product Code	UKT10034+

ELED TORCH 4AA ZOOM UNDERWATER KINETICS

Firefighters and industrial workers all over the world trust UK's 4AA eLED Zoom flashlight to get the job done.

- eLED with a 5 hour burn
- Light output 77lm
- Depth rating 3.05m
- Projection Optics let you zoom with a twist of the bezel from a wide beam to an intense spot
- Push button front ON/OFF switch
- Powered by 4 x AA / LR6 Alkaline Batteries (included)
- Tough, electrically non-conductive, non-corroding ABS and polycarbonate plastic construction
- Can be mounted on any Pacific helmet using the B2066114 Helmet Clip (sold separately)
- Made in the USA

ELED TORCH 4AA RED HERCULITE UNDERWATER KINETICS

The Red Herculite is a flashlight with superior LED technology that is lightweight and affordable.

- eLED with a 8 hour burn
- Light output 180lm
- Depth rating 3.05m
- Push button tail switch
- All-weather use
- Chemical resistant
- Water resistant to 1m
- Powered by 4 x AA / LR6 Alkaline Batteries (included)
- Can be mounted on any Pacific helmet using the B2066114 Helmet Clip (sold separately)
- Made in the USA

VIZION® ELED HEADLAMP 3AA UNDERWATER KINETICS

For superior hands-free illumination in every situation, count on the Vizion. The Vizion[®] Headlamp from Underwater Kinetics is waterproof for all-weather use and it's built tough to withstand the most challenging environments.

Vizion[®] incorporates Compound Path Optics (CPO) technology, which improves visibility and efficiency. It allows you to see further in poor visibility conditions like fog, smoke, rain, snow, and murky water.

- High and Low power settings
- eLED with 13 hrs (high) / 17 hrs (low) burn
- Light emission: 65 lm (high) / 35 lm (low)
- Beam distance: 60m (high) / 38m (low)
- Depth rating 10m
- All-weather use
- Large push button control switch works with heavy gloves
- Powered by 3 x AAA / Alkaline (included) or Lithium
- 3 Selectable beam patterns Spot, Diffuse and Red Diffuse
- High Impact ABS, LEXAN®, polyurethane rubber, and stainless steel construction for durability

WILDLAND PROTECTIVE GOGGLES PAC FIRE

Pac Fire's budget helmet mounted goggles are heat resistant, durable and flexible. The foam bound, non-vented goggle body moulds to the face increasing comfort while preventing smoke and other airborne contaminants entering to impede vision.

- Economical primary eye protection
- Wide vision and low profile goggle
- Accommodates multiple facial sizes
- Excellent clarity with no optical distortion
- Non-vented to prevent egress of smoke or airborne particles that may impede vision
- Quick release strap clips for easy removal even when wearing gloves
- 100% UVA / UVB protection for outdoor use
- FR frame, lens and straps
- Soft wrap-around TPV body for higher heat resistance
- Foam bound to aid in sealing
- Clear, polycarbonate, anti-static lens
- Goggle mount kit included

TITAN REMOTE PUSH TO TALK

This simple and robust Push To Talk streamlines communications. The extra large push to talk button located on the front of the unit is easy to operate even with gloved hands. The nexus connector allows the user to add a multitude of audio accessories including the Titan helmet mounted boom mic or throat mic.

- Extra large front facing PTT button
- Clothing clip with 360° rotation (45° increment stops)
- Nexus connection
- Configurable to most radio types

TITAN REMOTE HAND SPEAKER MICROPHONE

A comprehensive and versatile communications solution using a nexus connector to add a multitude of audio accessories - perfect for users who require helmet audio systems.

- Large front facing push to talk button
- Additional, side push to talk button
- Clothing clip with 360° rotation (45° increment stops)
- Volume control
- 3.5mm audio jack for earphone accessories
- Nexus connection

SC-14 ALL-PURPOSE CLEANER

SC-14 is an all-purpose cleaner and degreasing agent that not only removes dirt, grease and grime - but also cleans away contaminants and carcinogens.

SC-14 has been formulated to remove dirt and contaminants without compromising the integrity of the item your cleaning.

- For routine cleaning of helmets, equipment and surfaces
- Easy to use, all purpose cleaning and degreasing solution
- Effective on grease, grime soil and hydrocarbons
- Cleans away potentially harmful contaminants and carcinogens
- Compact shape for easy transport or storage
- Environmentally friendly, biodegradable and non-corrosive formula
- Free from potentially damaging sodium hydroxide and sodium metasilicate
- Available in a convenient 946ML spray bottle
- Tested and supported by the industry leading helmet manufacturer Pacific Helmets

PROTECTIVE CLOTHING

BRISTOL UNIFORMS

With over 50 years' experience in the specification, design and manufacture of firefighter Personal Protective Equipment (PPE) it is little wonder that Bristol's garments now protect firefighters in over 110 countries across the globe.

Bristol specialises in creating custom PPE solutions to meet the requirements of an individual service. Garments can be uniquely customised with a choice of outershell fabric, moisture barrier and thermal liner.

Over 300 different product feature variations can be added to one of Bristol's standard designs to construct the most functional and comfortable garments.

ACHIEVEMENTS & MILESTONES

- 1961 Wathen Gardiner & Co, formed an independent business, 'Bristol Uniforms' to focus on developing protective clothing for firefighters handling emergencies at RAF airfields in the UK.
- 1967 The arrival of specialised fabrics and fibres like DuPont™ Nomex[®] enabled the development and introduction of new specialised fire clothing to replace the woollen fire tunic
- 1970 The T63 was introduced as the forerunner of the modern fire suit and incorporated a serge material with a fire retardant finish
- 1995 The first European standard for firefighter clothing, EN469:1995 was introduced after three years in development

PROTECTIVE CLOTHING

- 2000 Bristol begins their managed services system which includes cleaning, decontamination, inspection, maintenance, garment tracking, collection and delivery
- 2003 After years of research and collaboration with major agencies in the UK, Ergotech Action ensembles were released spearheading a new generation of lightweight PPE
- 2011 Bristol introduces the revolutionary XFlex, a structural range with a unique thermal lining and sports-like styling
- 2012 RescueFlex was launched. The move towards balancing protection with comfort spurred a new generation of USAR PPE
- 2014 LayerFlex is launched. The LayerFlex design ensures firefighters are wearing garments suitable for the role being undertaken, rather than solely structural fire clothing

- 2015 A revolution in moisture barriers was released Gore[®] Parallon[™] . Soon after it's debut, Parallon[™] was offered as an option when customising XFlex ensembles
- 2017 Based on the revolutionary XFlex design, EcoFlex Wildland was launched. EcoFlex was developed to address the unique challenges and environmental factors faced by wildland firefighters in Australia
- 2017 Titan PBI® Gloves were launched in Australia the first textile structural firefighting gloves certified to AS/NZS 2161.6:2014
- 2018 In line with a growing focus on firefighter health, Bristol releases the NanoFlex hood range that incorporates traditional flash hood features as well as protection from potentially harmful particulates

STRUCTURAL OUTERSHELL FABRICS

Outershell fabrics protect the wearer from flame and radiant heat. The following fabrics are a small selection of Pac Fire favourites.

NOMEX[®] 360[™]

Nomex[®] 360[™] delivers a balance of firefighter comfort, mobility and protection while being extremely durable. Filament Twill Technology, Nomex[®] 360[™] spun yarns and DuPont[™] Kevlar[®] filament, ensure fabric strength and flexibility after direct flame exposure.

WEIGHT

COMPOSITION

1% Antistatic 170qsm

73% Kevlar, 14% Nomex, 12% PBO,

PBI® MAX

PBI[®] Max is a lightweight, high performance fabric that will not shrink or break open when exposed to extreme heat and flame. PBI[®] Max is one of the strongest outershell fabrics offered which retains high levels of comfort and flexibility for the wearer. PBI[®] Max has a DuPontt[™] Teflon F-PPE water repellent finish.

COMPOSITION	70% PBI® (Dominant PBI/Kevlar blend spun yarn) 30% Kevlar® filament yarn
WEIGHT	, 205asm

TITAN® PBI 1260

TITAN 1260 is a 220gsm, highly breathable, outer shell or single layer fabric featuring Nomex[®], Kevlar[®] and PBI[®]. This fabric features 'Active Air Entrapment' provided by the double cloth construction. The inclusion of PBI[®] fibre increases thermal integrity, ensuring that the fabric remains flexible and intact.

COMPOSITION 74% PBI® (proprietary blend), 23% Nomex®, 3% Kevlar®

220gsm

WEIGHT

TITAN® 1220

TITAN 1220 is a breathable fabric designed for the outershell of structural firefighting garments, reducing the risk of heat stress by keeping you cool and comfortable. It combines the flame resistant properties of Nomex[®] and Kevlar[®] to provide thermal protection and durability for the most demanding situations.

COMPOSITION	89% Nomex®, 9% Kevlar®,
	2% Antistatic
WEIGHT	220gsm

STRUCTURAL MOISTURE BARRIERS

The moisture barrier protects against external water penetrating the garment and contacting the skin while effectively wicking away sweat keeping the wearer cool, protecting against steam related injuries and mitigating heat stress.

GORE[®] PARALLON™

The GORE® PARALLON™ quick dry system has been developed to mitigate the risks associated with moisture and heat stress by introducing a unique solution that incorporates a highly breathable Gore thermal barrier combined with a CROSSTECH® Moisture barrier.

> This is a unique use of two membranes encapsulating a layer of thermal protection that maintains breathability while wicking moisture away from the skin and out through the ensemble, simultaneously preventing liquid penetration from the outside.

COMPOSITION	Face/fabric 100% Aramid & content 70% Aramid, 30% FR Viscom membrane based on EPTFE
WEIGHT	370gsm

PROTECTIVE CLOTHING

GORE® CROSSTECH® AIRLOCK

A combination of thermal protection and moisture barrier which eliminates the need for extra-thick insulation. The innovative construction uses thermally stable and chemically resistant foam silicone spacers to create an insulating air cushion, giving a very high level of thermal protection without a bulky and restrictive insulation layer.

COMPOSITION

2-layer laminate of PTFE film on m-aramid/ p-aramid non-woven with chemical-resistant closed cell foam silicone spacers 225gsm

WEIGHT

NOMEX[®] "SLICK' LINER

A red, plain weave, 120gsm, 100% Nomex[®] filament liner. This assists with thermal protection, total heat loss, comfort and also supports donning and doffing of the garments.

COMPOSITION 100% Nomex® WEIGHT 120gsm

WILDLAND TECHNICAL FABRICS

The latest technical fabrics available for single layer wildland garments are particularly light, breathable and inherently flame retardant while remaining durable and resistant to abrasion.

STRUCTURAL THERMAL LINERS

A structural garments thermal lining provides protection from heat and proximity to flame.

QUILTED Q13

The Q13 (N20PO+F31) thermal liner consists of DuPont[®] Nomex[®] spunlace with Nomex[®] Delta C quilted together by Abbey Quilters in 10cm boxes using Nomex[®] thread.

This liner offers lightweight comfortable, inherent thermal protection against heat and flame.

Nomex[®] Delta C encompasses antistatic properties, reduces moisture absorption, dries quickly and is very forgiving on the skin.

N20PO		F31	
COMPOSITION	93% Nomex® 5% Kevlar® 2% Antistatic	COMPOSITION	67% Nomex® 33% Kevlar®
WEIGHT	110gm2 +/- 5%	WEIGHT	50gm2 +/- 13%

ECO-DRY SHIELD

Eco-Dry Shield from Hainsworth is a technical fabric for wildland garments. The unique combination of fibres results in outstanding protection against heat and flame while remaining comfortable to wear during high activity levels.

COMPOSITION	31% Wool / Lenzing FR and 69% DuPont™ Nomex®
WEIGHT	240gsm

KARVIN

Karvin is one of the latest technical fabrics by Estambril. This lightweight fabric has been specifically designed for wildland firefighting applications and provides optimum protection against radiant and convective heat as well as outstanding abrasion, colour fastness and strength.

LAYER FLEX

PRODUCT SPECIFICATIONS

Application	Structural Firefighting
Sizes	28 Male 28 Female Custom sizes are available
Certification	EN469: 2005

LayerFlex was designed to introduce a new layered approach, using three garments. When used in different combinations, layers provide the required levels of protection for Structural firefighting, Wildland firefighting and technical rescue.

These garments have been designed to ensure that a firefighter is wearing garments which are suitable for the role being undertaken, rather than wearing structural fire clothing for all roles (including Technical Rescue and Wildland firefighting).

The ensemble consists of three garments: A RescueFlex jacket, XFlex outer jacket and XFlex trousers

PROTECTIVE CLOTHING

JACKET FEATURES

- Tapered body shape
- Hem curved up at front and down at back comfort and protection
- Shoulder shape and under arm gussets allow for full rotational arm movement
- Shoulder yoke shaped for comfort, especially with breathing apparatus
- Deep return on cuff hem ensures gloves fit well inside sleeve
- Fully breathable through all layers

TROUSER FEATURES

- Natural waistline at front with high curved back
- Centrally placed zip fly allows tapering of top of trouser, giving superior fit and making it easier to put on
- H Braces with unique webbing slide adjuster
- Large twin action pleat cargo pockets with drain holes
- Fully articulated, 3D knee shaping greater movement
- American Specification 3M perforated triple trim with Trim Saver
- Telescopic trouser cuff to minimise convective heat flow up the leg

XFLEX

XFlex is Bristol Uniforms premium lightweight structural firefighting ensemble.

Ergonomically designed, the XFlex focuses on delivering maximum comfort for a vast range of male and female body types.

XFlex has distinctive sporting style which allows the ensemble to move with the firefighter attracting less resistance resulting in greater flexibility and less energy expenditure.

PRODUCT SPECIFICATIONS	
Application	Structural Firefighting
Sizes	28 Male 28 Female Custom sizes are available
Certification	AS/NZS 4967:2009 AS/NZS 4602.2:2013

JACKET FEATURES

- Tapered body shape
- Hem curved up at front and down at back comfort and protection
- Shoulder shape and under arm gussets allow for full rotational arm movement
- Shoulder yoke shaped for comfort, especially while wearing breathing apparatus
- Double zip flap extends to neck with internal zip guard to protect throat
- Stiff standalone collar providing full protection for the neck and throat with soft knitted inner collar.
- Large landscape side pockets with drain holes

- Vertical pocket under zip flap
- Large internal pocket with care and instruction label
- Ergonomic 3D articulated elbow for greater flex
- Hem of sleeve curved over back of hand for additional protection.
- Deep return ensures gloves interface well inside the sleeve.
- American Specification 3M perforated triple trim with Trim Saver
- Inspection port with zip closure
- Pen pocket
- Hanger loop for easy storage

PROTECTIVE CLOTHING

TROUSER FEATURES

- Natural waistline at front with high curved back
- Centrally placed double zip including hook and loop with press stud fastener.
- H Braces with unique webbing slide adjuster
- Large twin action pleat cargo pockets with drain holes
- Fully articulated, 3D knee shaping greater movement
- American Specification 3M perforated triple trim with Trim Saver
- Extra large inspection port with zip closure
- Telescopic trouser cuff to minimise convective heat flow up the leg

- Leg opening designed for ease of donning
- Hanger loop for easy storage

FABRIC & MOISTURE BARRIER OPTIONS

The XFlex design is completely customisable to meet a specific person or agencies requirements.

Specify the best outershell fabric, moisture barrier and thermal lining for your particular application.

Lead times will apply for these garments due to the highly customisable nature of XFlex.

ERGOTECH ACTION ELITE

Developed after careful research and extensive user trials into the ergonomics of firefighter activities, the ErgoTech Action Elite has become the standard by which lightweight firefighter PPE is measured for comfort and performance.

ErgoTech has been developed in close collaboration with the world's leading fibre and fabric manufacturers. It has become a globally recognised design by fire agencies looking to equip their firefighters with PPE, which combines outstanding protection with low physiological impact.

PRODUCT SPECIFICATIONS

Application	Structural Firefighting
Sizes	28 Male 28 Female Custom sizes are available
Certification	AS/NZS 4967:2009 AS/NZS 4602.2:2013

JACKET FEATURES

- Collar and throat tab shape provide optimal compatibility with helmet and fire hood
- Shoulder shape and increased upper sleeve allow full rotational mobility in shoulder and arm
- Shaped panel over the shoulder eliminates the shoulder seam and makes a smoother line with greater comfort when wearing breathing apparatus
- Shoulder yoke shaped for comfort, especially with breathing apparatus
- Increased underarm gusset allows more manoeuvrability when reaching overhead
- Two action pleats added at the back shoulder

- Hanging loop for storage
- Tecashield on elbows
- Cuffs with thumb holes
- American Specification 3M perforated triple trim with Trim Saver
- Inspection port with zip closure
- Torch holder
- Radio pockets
- Pen pocket
- Logo print available on the back
- 2 hook and loop badge spaces

PROTECTIVE CLOTHING

TROUSER FEATURES

- Articulated knees with convex seams for greater flexibility when bending/climbing
- Arashield on knees for greater protection
- Shaped seaming on back of knee to reduce fullness when crawling
- Top of trouser contoured to the body with raised back and elasticated adjustment across lumbar region
- Removable H pattern braces designed not to twist
- 2 large half bellow pockets
- American Specification 3M perforated triple trim with Trim Saver
- Inspection port with zip closure

- Hook & loop leg openings
- Hanger loop for easy storage

FABRIC & MOISTURE BARRIER OPTIONS

Pac Fire's Ergotech Action Elite ensemble comes standard with a TITAN PBI® 1260 outershell and Gore® CROSSTECH® AIRLOCK® moisture barrier.

Ergotech Action Elite can be customised with a different outershell fabric and moisture barrier on request. Lead times apply for custom garments.

TITAN PBI® 1260

BTECH

The philosophy behind BTech was to produce a comfortable and practical garment, without any compromise to safety.

The short style jacket is designed with ergonomic fit. The trouser measurements provide adequate overlap, so that there is no gap between coat and trousers when bending.

Popular BTech is now a favourite with many Fire authorities in Australia as well as other countries worldwide.

PROTECTIVE CLOTHING

FABRIC OPTIONS

Pac Fire's BTech ensemble comes standard with a Nomex® Delta T outershell in lime or navy.

BTech can be customised with a different outershell fabric on request. Lead times apply for custom specified outershell fabrics.

NOMEX® DELTA T LIME NOMEX® DELTA T NAVY

MOISTURE BARRIER OPTIONS

BTech 1 consists of outershell and fabric lining whereas BTech 2 includes a moisture barrier in it's construction.

The moisture barrier provides added protection from external water penetrating the garment and contacting the skin while effectively wicking away sweat keeping the wearer cool, protecting against steam related injuries and mitigating heat stress.

Pac Fire's standard BTech 2 includes a Gore-Tex® Fireblocker® moisture barrier. BTech 2 can be customised with a different moisture barrier on request. Lead times apply for custom specified moisture barriers.

ECOFLEX WILDLAND

EcoFlex is a lightweight wildland ensemble designed specifically for the challenges faced by Australasian firefighters.

Ergonomically designed, EcoFlex provides the ultimate in fit and comfort for the maximum number of body types. EcoFlex has distinctive sports styling suitable for the hazardous roles associated with a wildland firefighter's work.

Innovations in technical fabrics provide optimum protection against extreme radiant and convective heat whilst offering the wearer comfort during extended exposure to high temperatures.

PRODUCT SPECIFICATIONS	
Application	Wildl

Sizes Certification Wildland Firefighting Rescue 28 Male | 28 Female Custom sizes are available AS/NZS 4824:2006 AS/NZS 4602.2:2013

JACKET FEATURES

- Collar and stowable throat tab shaped to provide optimal compatibility and protection with Pacific Helmet range
- Shoulder shaped with increased upper sleeve allows full rotational mobility in the shoulder and arm
- Shaped panel over the shoulder eliminates the shoulder seam and makes a smoother line with greater comfort
- Increased underarm gusset allows more manoeuvrability when reaching
- Underarm vents for increased air flow
- Moulded zip with hook and loop flap
- Hanging loop centrally located at the rear of the collar

- Microphone loop
- Adjustable torch loop
- Underarm vents for increased air flow
- 2 front breast pockets with drainage holes
- 2 lower front pockets, box bellowed, with drainage holes
- American Specification 3M perforated triple trim with Trim Saver
- Rank slide front centre of jacket
- Custom printed logo on centre lower back

PROTECTIVE CLOTHING

TROUSER FEATURES

- 2 radio pockets positioned at the rear hip •
- Cargo pockets on trousers
- Moulded zip with flap
- **Belt loops**
- American Specification 3M perforated triple trim with Trim Saver

FABRIC OPTIONS

Customise your EcoFlex ensemble with the latest in technical fabrics that strike the perfect balance between protection, comfort and the mitigation of heat stress.

Lead times apply for custom specified fabric.

ECO-DRY SHIELD

TECHS260

RESCUEFLEX

Technical rescue situations present a unique set of challenges.

RescueFlex has been designed to be used in confined spaces, while remaining equally adaptable for other technical rescue situations such as road traffic accidents.

Bristol's ResceFlex incorporates two layers – a flame retardant outer layer and a waterproof membrane which includes a pathogen barrier. The jacket and trousers can be zipped together to form one piece when required.

PRODUCT SPECIFICATIONS	
Application	Technical Rescue

MERINO UNDERGARMENTS

Icebreaker acts and feels like a second skin. 100% merino Icebreaker garments are soft, machine washable, they resist odour, dry quickly, and are exceptionally breathable.

Icebreaker assists in regulating temperature in all climates and conditions.

- 100% Merino Wool
- 200gsm fabric weight
- Exceptional breathability
- Natural flame redundancy
- Does not melt, shrink or stick to the skin when exposed to high temperatures
- Provides resistance to acids
- Offers greater resistance to chemical residues and aerosols than synthetic garments
- Thermo-regulates the skin reducing the occurrence of overheating or chills
- Naturally antibacterial reduces the incidence of skin infection
- Does not generate odour after prolonged use
- Soft yet durable
- Easy care, machine washable (with wool wash)
- Quick dry

PROTECTIVE CLOTHING

BRISTOL NANOFLEX FLASH HOODS

The NanoFlex particulate blocking flash hood provides the comfort and protection you would expect from Bristol Uniforms while striking the perfect balance between mitigating heat stress and filtering harmful particulates found on the fire ground.

Recent studies into firefighter health and well-being suggest that the flash hood is the most penetrable piece of protective clothing worn by the firefighter, a particularly troubling finding considering the face and neck have been identified as areas of significant dermal exposure to potential carcinogens.

Bristol Uniforms revolutionary Nano Flex flash hood has been proven to be 99.8% successful at filtering harmful particulates while remaining lightweight, soft and breathable, while minimal sound is produced through head movement resulting in greater situational awareness for the firefighter.

LIFE LINERS PARTICULATE BLOCKING FLASH HOOD

The Life Liners particulate blocking flash hood is designed to deliver both comfort and protection while blocking potentially harmful carcinogens from entering the body via absorption through the skin.

- Two piece design with 15cm front with 20cm back
- Separate head with sewn on back and front bib. Back of head ends at the nape of the neck for improved fit and comfort
- Easy-Seal Face opening that goes on easy and seals tight.
- 100% Nomex® thread
- Outer Layer Fabric: 49% Kermel / 49% Lenzing FR/ 2% Spandex Inner Layer Fabric: Stedair Prevent
- All head and bib seams are sewn with a flat lock stitch
- 3.8cm binding sewn to hem through folder with a three thread cover stitch to create a 1.25cm finished bound hem

ASSOCIATED PRODUCTS

P2 DISPOSABLE FOLDING MASK - SINGLE VALVE

Pac Fire's folding P2 are designed for emergency service personnel who demand a high level of personal protection from airborne hazards experienced in the work environment.

- P2 Dust Mask for protection against dust and mist
- Plastic exhalation valve for greater ventilation
- Convenient and economical disposable mask
- Double strap mask with aluminium nose clip for firm and secure fit
- Activated charcoal layer to remove nuisance level odours
- Wide and soft non-latex straps are staple free to minimise irritation

PRODUCT SPECIFICATIONS	
Product Code	RDM30
Application	Wildland Firefighting General Purpose
Certification	AS/NZS 1716

P2 DISPOSABLE FOLDING MASK - TWIN VALVE

The twin valve folding mask is used to protect against mechanically and thermally generated particulates.

- P2 Dust Mask for protection against dust, mist and wildland fire smoke
- Equip with two plastic exhalation valves
- Individually wrapped, vertically folding mask
- Double strap mask with aluminium nose clip for firm and secure fit
- Activated charcoal layer to remove nuisance level odours
- Wide and soft non-latex straps are staple free to minimise irritation

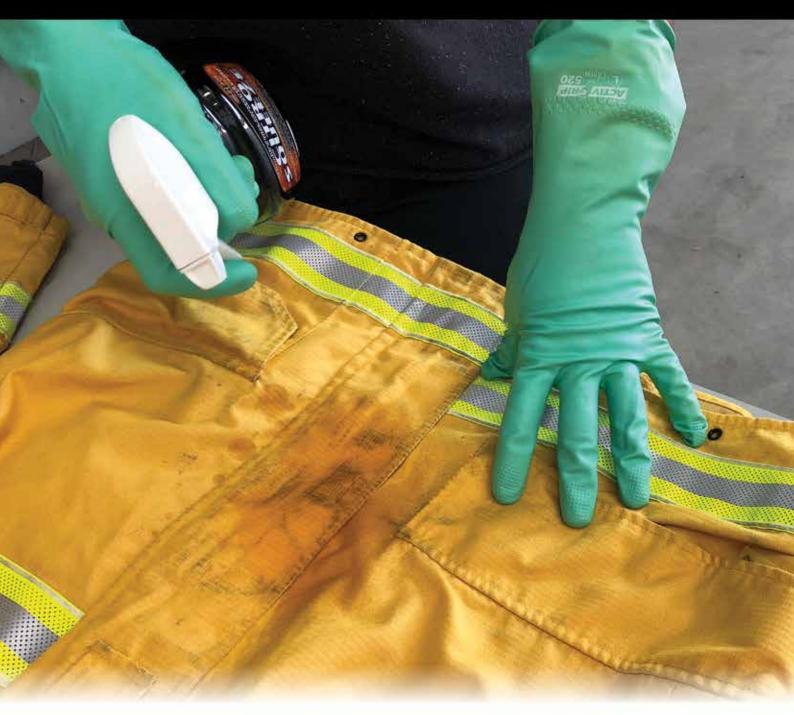

CITROSQUEEZE®

NFPA 1851 compliant CITROSQUEEZE® is the recommended technical detergent available for safely cleaning oil, soot, grease and other contaminants from all types of PPC and FR clothing.

- For routine cleaning of all PPC and FR clothing
- Easy to use, high performance cleaning solution
- Effective on dirt and grime
- Available in a 946ML spray bottle "pre-treatment" or a bulk 3.78L jug of technical detergent

PRODUCT SPECIFICATIONS	
Product Code	FS-C
Options	FS-C-032-6 - Pre-Treatment - 946ML Spray Bottle (Box of 6 bottles) FS-C-001-4 - Technical Textile Detergent – 3.78L Jug (Box of 4 jugs)

FOOTWEAR

ROBUST & COMFORTABLE PROTECTION

"Hades" from YDS is a robust and comfortable fire and rescue boot.

Built to provide premium protection, the Hades boots are made from 2.5-2.7mm fire resistant cow hide leather. Hades are manufactured to include additional safety features such as steel toe caps, a steel midsole with cut resistant strip, shock absorbing dual density shock absorbing rubber soles and more.

SKELLERUP FIREFIGHTER EXTREME

Type 3 structural fire fighting boots are designed to provide firefighters with the very highest level of available protection.

The Skellerup Firefighter Extreme takes this protection even further with additional levels of chemical resistance to ASTM F739 and linings woven from a combination of Nomex® and Kevlar® for ultimate comfort and protection.

- Inner lining: woven Nomex[®] / Kevlar[®]
- Slip resistant SRC commando outsole with ladder grips
- Penetration resistant composite midsole
- Comfort form steel toe cap
- Cut out pull handles
- Cushioned shin guard
- Multi-fit footbed system
- Resistant to fuel oil, mild acids, mild alkalis and hazardous materials
- Insulating against electrical shocks

Product Code UKT22101 Certification Class 1, Division 1 Intrinsically Safe Ingress protection IP67

VIZION[®] ELED HEADLAMP 3AA UNDERWATER KINETICS

The Vizion[®] Headlamp from Underwater Kinetics is waterproof for all-weather use and it's built tough to withstand the most challenging environments.

- High and Low power settings
- eLED with 13hrs (high)/7 hrs (low) burn
- Light emission: 65lm (high)/35lm (low)
- Beam distance: 60m (high)/38m (low)
- Depth rating 10m
- Compound Path Optics (CPO) technology improves visibility and efficiency especially in poor visibility conditions
- All-weather use
- Large push button control switch works with heavy gloves
- Powered by 3 x AAA / Alkaline (included) or Lithium
- 3 Selectable beam patterns Spot, Diffuse and Red Diffuse
- Made in the USA

PRODUCT SPECIFICATIONS	
Product Code	UKT17018
Certification	Ingress protection IP67

The Lighthouse torch is a multi-functional personal lighting device. It can be handheld like a traditional flashlight, worn on a safety vest as well as wildland or structural firefighting clothing, magnetically mounted on a metal work area, or stood up on any flat surface.

NEW

- eLED with a 8.5 hour burn
- Light output 130lm
- Pivoting head for use as a hand held flashlight
- Neodymium magnet mounts to any steel surface for use as a work light
- Powered by 4 x AA / LR6 Alkaline Batteries
- Made in the USA

PRODUCT SPECIFICATIONS	
Product Code	UKT514703
Certification	Class 1, Division 1 Intrinsically Safe Ingress protection IP67

290 SERIES FEATURES

1

- Patented fresnel lens to maximise beam visibility
- 2 High luminosity, solid state LEDs, rated for 100,000 hour + operating life
- 3 Clear, shatterproof polycarbonate lens
- 4 Fail-safe positive activation microswitch to prevent accidentally turning the beacon off
- 5 Colour coded, beacon light pins
- 6 High visibility, durable, impact resistant ABS plastic beacon body
- 7 Hard wearing ABS plastic clips
- Powered by 4 x AA batteries
- Precision o-rings making the beacon waterproof, dustproof and safe to operate in hazardous areas
- Flash rate 165-185fpm
- Single (steady on and flash) or dual (dual flash only) coloured LED
- 200mm tall

BEACONS

SAFETY IN A FLASH

Eflare Beacons are lightweight, compact and easy to deploy. They provide a fast solution to creating a highly visible warning or safety zone.

The beacons boast an incredibly long service life thanks to high quality manufacturing materials such as shock resistant ABS plastics and shatterproof polycarbonate.

Eflare provides a safe, reusable and cost effective alternative to pyrotechnic or chemical flares. They are visible for a distance of more than 1 kilometre without night vision, point fixation or distance judgement problems associated with strobe or incandescent lighting.

280 SERIES COMPACT EFLARE

Eflares tried and trusted safety beacon in a compact size. Standing just 15cm tall this tough little beacon still supplies the user with 20+ hours of operating life per battery change.

- High luminosity, solid state LEDs
- Flash rate 165-185fpm
- Single (steady on or flash) or dual (flash only) coloured LED
- Clear, shatterproof polycarbonate lens
- High visibility, durable, impact resistant ABS plastic beacon body and side clip
- Precision o-rings making the beacon waterproof, dustproof and safe to operate in hazardous areas
- Powered by 4 x AA batteries
- 150mm tall

700 SERIES EFLARE

All the features of the 290 series Eflares - powered by 2, D Cell batteries increasing operating life to 40+ hours. The handy battery charge indicator lets you keep track of cell life quickly and easily.

- High luminosity, solid state LEDs
- Flash rate 165-185fpm
- Single (steady on or flash) or dual (flash only) coloured LED
- Clear, shatterproof polycarbonate lens
- ABS plastic beacon body and side clips
- IP66 and Intrinsically Safe
- Powered by 2 x D Cell batteries
- 200mm tall
- Battery charge indicator

Stow and carry 4-6 Eflare Beacons plus accessories

PRODUCT SPECIFICATIONS
Product Code EFMBAG

FANS & VENTILATION

SUPERCHARGE Your response Time

& PORTABLE

DUAL POWER

Blowhard Fans have single handedly revolutionised the way ventilation in emergency situations is approached.

Blowhard's BH-20 PPV fan has been designed for high pressure to effectively drive ventilation. The high velocity jet stream produced by the BH-20 assists in building pressure to effectively clear smoke from the structure.

Boasting unique design and construction, the BH-20 is lighter, smaller, incredibly durable and more powerful than other fans on the market today.

The soft start motor can be powered with both a mains outlet or Blowhard's long lasting, Li-Ion battery pack. This feature allows the fan to be set up faster and started instantly - in some instances cutting down response time by up to 6 minutes.

FANS & VENTILATION

FAN FEATURES

- Dual powered operates on battery and mains power
- Soft start, variable speed motor
- Maximum Amps 7 amps at 110V / 3.5 amps at 220V
- Recover 80% charge in 1 hour / full charge in 3 hours (no memory)
- Runtime: 35 minutes at 10,500CFM or 60 minutes at 9,000CFM
- Includes shoulder strap for easy deployment and repositioning
- Easy to operate controls
- Produces high velocity jet stream

- Starts instantly on battery power
- Doubles as PPV fan
- Weighs only 27kgs

HOSE & FITTINGS

HOSE & FITTINGS

HAND PROTECTOR

ANT-KINK PROTECTOR

MONOFLEX S HD FIRE HOSE

Pac Fire's Monoflex hose is a lightweight and flexible type S fire hose. The inside of the hose is made from high-quality, very light synthetic rubber. While the jacket is constructed from 100% high tenacity synthetic polyester yarn and special monofilament yarns in the weft provide dimensional stability.

- Resistant to aging and ozone and UV
- Excellent abrasion resistance
- Temperature range from 40°C up to +100°C
- Minimum friction loss due to very smooth inner lining

INSIDE DIAMETER (in mm)	WEIGHT (in g)	WORKING PRESSURE in bar in PSI	BURSTING PRESSURE in bar in PSI

SYNTEX SIGNAL PERCOLATING HOSE

The Syntex Signal percolating hose is a Pac Fire favourite. It's constructed from 100% high tenacity polyester yarn in a circular twill weave with warp threads multiple twisted. The inside is high-quality, very light synthetic rubber.

- Fluorescent yellow colour highly visible in darkness and smoke
- Suitable for seawater, hot water and steam
- Ageing and ozone resistant
- Temperature range from -40°C up to +100°C
- Water weeps through the jacket to prevent hose from catching fire whilst being manoeuvred around the fire ground
- Standard hose diameters 25 & 38mm. Other options available on request - lead times will apply

CHEMICAL & PROTECTIVE SUITS

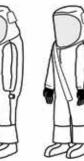

KAPPLER ZYTRON 500

For more than four decades Kappler has led the industry with patented technology and proven garment designs.

The Zytron 500 range offers top level protection for demanding hazmat response. Zytron 500 material provides greater than 8 hour holdout against hundreds of chemicals with proven resistance against chemical warfare agents (CWA).

- Zytron 500 is a soft, pliable fabric that remains comfortable for extended use
- Greater than 8-hour holdout against hundreds of chemicals
- Proven holdout against Chemical Warfare Agents (CWA)
- Many features and options in a wide variety of encapsulating suits and coverall styles.
- Available in hi-viz orange and charcoal grey.
- Applications: Hazmat response, chemical handling, refuelling operations, petrochemical operations, hazardous material clean-up and remediation, CWA incineration, remediation and disposal.

CHEMICAL SUITS

ZYTRON 400

Zytron 400 is a durable fabric with great physical properties and broad chemical holdout - an economical alternative to Zytron 500.

- ASTM F1001 chemical holdout performance similar to Zytron 500
- Tough fabric with excellent physical properties for demanding work applications
- Attached gloves are an available custom option
- Styles include a variety of coveralls plus total encapsulating suits and hood/jacket/trouser combos.
- Applications: Chemical handling, petrochemical operations, hazmat response and clean-up

Options	Heat sealed / taped or ultrasonic seams Front or rear entry for total encapsulating suits
Certification	ASTM F1001

KAPPLER CHEMTAPE

Kappler ChemTape is a specially designed and tested adhesive tape for added barrier protection against hazardous chemicals at the seams, zippers and other openings found on chemical protective clothing.

- Chemical-tested sealing tape
- Provides strong, durable barrier protection •
- Used to attach components of a protective ensemble or to reduce the possibility of gross liquid flow at interfaces
- An ideal solution when mid to high range chemical protection is needed
- Attaches protective clothing components-sleeve-to-alove, ankle-toboot, hood-to-face piece, storm flap-suitable for pipe sealing, shelter or tent repair, and "safe room" sealing
- Applies quickly
- 48mm wide x 50 metres long

FRONTLINE 500

NFPA-certified multi-use, single-exposure garment provides economical alternative to expensive FR reusables.

Frontline 500 is a single suit that provides three-way protection against chemical, flash-fire and radiant heat.

- Expanded view anti-fog visor system standard on all gas (vapour) tight suits
- Removable knitted Kevlar[®] overglove, plus field-replaceable 2N1[®] Glove System which eliminates inner glove inversion
- Highly flexible 120cm gas tight AquaSeal® zipper facilitates easier donning and doffing
- Provides excellent "survivability" performance 0% body burn in Pyroman Thermal Manikin testing
- Single garment eliminates need for two-suit NFPA 1991 configuration.
- Front and rear entry options available
- Applications: Hazmat response and chemical handling with potential for chemical flash-fire.

FOAM

RF3-1000

SOLBERG RE-HEALING FOAM RF3

Solberg Re-Healing foams protect lives and property while having a minimal environmental impact.

Solberg RF3 is an effective Class B concentrate and contains only synthetic hydrocarbon surfactants. It works with all current equipment and offers excellent control and extinguishment.

- Effective Class B concentrate and contains only synthetic hydrocarbon surfactants
- Excellent control and extinguishment
- Works with common foam proportioning devices
- Use for liquid fires, chemical spills or vapour suppression
- Can be used with fresh, sea or brackish water
- Clings to vertical surfaces and hot metal
- High temperature resistance
- Long drain time
- Dry chemical compatible
- Increased burn back survivability
- Does not contain Fluorosurfactants, Fluoropolymers or Fluorotelomers

FOAM

SOLBERG RE-HEALING FOAM RF6

Solberg RF6 has been successfully designed for fighting Class B fires. RF6 can be applied with all existing equipment. When proportioned at 6% concentration with water of all kinds it has the ability to flow quickly and freely across the surface of hydrocarbon flammable liquid fuel.

- Effective Class B concentrate and contains only synthetic hydrocarbon surfactants
- Excellent control and extinguishment
- Works with common foam proportioning devices
- Use for liquid fires, chemical spills or vapour suppression
- Clings to vertical surfaces and hot metal
- High temperature resistance
- Long drain time
- Increased burn back survivability
- Shelf life of 20 years plus
- Does not contain Fluorosurfactants, Fluoropolymers or Fluorotelomers.

SOLBERG HIGH EXPANSION FOAM

Solberg High Expansion Foam is a synthetic, foaming agent containing, amongst other ingredients, a blend of hydrocarbon based surface active agents. This foam is primarily used to extinguish fires located in inaccessible areas like warehouses.

- Effective class A & B concentrate
- Synthetic foaming agent
- Uses displacement of air as main extinguish mechanism
- Low mixture rate makes High Expansion Foam economical
- Low environmental impact
- Non-toxic
- Can be used in conjunction with other foam products
- Induction rate of 1-2%
- Excellent fire suppression capabilities
- Fluoro-free foam

SOLBERG FIRE-BRAKE 3150A

Solberg Fire-Brake™ 3150A is a proven Class A foam that has been used on some of the worst Australian bushfires in the past two decades.

- Effective Class A concentrate that can be used from 0.1% to 1%
- Multi-purpose foam used for mop-up, suppression, back burn and protection
- Foam holds and slowly releases water
- Clings to fuels
- Acts like a thermal barrier
- Foam can be used to blanket and smother a fire
- White in colour for easy visibility
- It can be used for ground and aerial tankers
- 3150A foam solutions are low in corrosion
- Fluoro-free foam

PRODUCT SPECIFICATIONS

DOT-01 All-Round

DOT SYSTEMS STORAGE DEVICES

The DOT system incorporates storage devices for contaminated protective clothing and equipment. DOT Bags are encapsulation systems developed for fire and rescue personnel - reducing exposure from contaminated PPE during handling and transport.

DOT bags are easy to work with, safe and specially adapted for fire and rescue vehicles.

- Available in two styles: DOT-01 All Round and DOT-02 Equipment
- For the safe stowage and transportation of contaminated PPE
- Made from Polyester reinforced with polyvinyl chloride
- Can be cleaned and reused
- Compact shape for easy transport or storage
- DOT-02 features a handy contamination indicator on the handle which can display green for clean or red for soiled

MEDICAL BAGS

ED BUE

MOBILE FIRST AID SOLUTION,

Rescue Swag was developed to keep you safe during life' adventures, wherever you are, whatever you do.

Originally featured on entrepreneurial cult television show, "The Shark Tank", the Rescue Swag was developed after creator Tracey Beikoff came off her horse and identified the need for a mobile first aid solution that was more than just bandaids and gauze. 

OMNI™ PRO is a professional solution, built to help you rapidly and proficiently deploy medical care during critical moments and save lives. Built from the strongest materials and a smart design, and the versatility to modify to your requirements, the OMNI PRO™ delivers a customisable and

organised option for the storage and transportation of your equipment

- Organise the main compartment of the OMNI™ PRO with the slider system
- Overlapping panels secure internal contents
- Grommet holes allows all compartments to be air dried while the bag is completely closed
- Designed for use as a backpack, shoulder bag, can be carried briefcase style, or can be grabbed from any position using a system of light weight comfort-grip side handles
- Features fully padded lumbar support
- Oversized YKK zippers
- PVC lined back and bottom resists water and wear
- Customise the OMNI™ PRO Bag with the airway intubation module, Xtra Fill module and MEDKIT medications module
- OMNI™ PRO is compatible with TS2 Ready™ modules

TOOLS & Accessories

ORIGINAL QUICK FIST® CLAMP

Quick Fist® Original mounts easily to keep shovels, axes, hoses and other tools securely in place.

- Made from UV resistant, heavy duty, transportation grade rubber
- Each clamp supports a safe working load of 11kg
- Holds objects 25mm to 57mm in diameter
- Mounts easily with 1 x #10 bolt or screw
- Mounting area 64mm x 19mm
- Secure storage solution for emergency vehicles, work trucks, military, all terrain vehicles and boats

PRODUCT SPECIFICATIONS

MINI QUICK

FIST[®] CLAMP

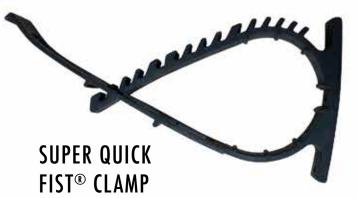

Quick Fist® Mini is great for mounting fishing rods, wire bundles, small flashlights, hand tools, brooms, and poles. Can also be used to mount objects to a pipe or round tubing

- Made from UV resistant, heavy duty, transportation grade rubber
- Each clamp supports a safe working load of 11kg
- Holds objects 16mm 32mm in diameter
- Mounts easily with 1 x #10 bolt or industrial adhesive
- Mounting area 38mm x 38mm.

PRODUCT SPECIFICATIONS

Product Code QF30055

The Super Quick Fist® is an ideal storage solution for air tanks, fire extinguishers, nitrous oxide tanks, scuba tanks and more.

- Made from UV resistant, heavy duty, transportation grade rubber
- Each clamp supports a safe working load of 23kg
- Holds objects 64mm to 240mm in diameter
- Mounts easily with 3 x #10 bolts or screws
- Mounting area 152mm x 22mm

PRODUCT SPECIFICATIONS Product Code QF20023

QUICK FIST® XL CLAMP

Quick Fist® XL is the largest clamp in the range - two straps hold objects with a diameter of 381mm and supports 68kg.

- Made from UV resistant, heavy duty, transportation grade rubber
- Quick Fist® XL clamps are a pair of straps which support a safe working load of 68kg with a break strength of 136kgs
- Holds objects up to 381mm in diameter
- Each strap mounts easily with 4 x #10 bolts or screws.
- Mounting area 51mm x 51mm.

PRODUCT SPECIFICATIONS

Product Code QF60023

QUICK FIST® CLAMP

Go Between Quick Fist® has been designed to hold tools and equipment with a diameter between 44mm to 73mm.

- Made from UV resistant, heavy duty, transportation grade rubber
- Each clamp supports a safe working load of 23kg
- Holds objects 44mm to 73mm in diameter
- Mounts easily with 2 x 6mm bolts or screws

QF80023

- Mounting area 25mm x 89mm.
- Ideal for securing items like 50mm pike pole, battering rams, nozzles, pipe, struts and more

PRODUCT SPECIFICATIONS

Product Code

The Nozzle Quick Fist® holds objects with a diameter of 70mm -83mm with a safe working load of 23kgs.

- Made from UV resistant, heavy duty, transportation grade rubber
- Each clamp supports a safe working load of 23kg
- Holds objects 70mm 83mm in diameter
- Mounts easily with 1 x #10 bolt or screw
- Mounting area 113mm x 32mm.

PRODUCT SPECIFICATIONS

Product Code QF50052

QUICK FIST® LONG ARM CLAMP

Quick Fist® Long Arm is a solution for tools with handles or equipment that coils - like hoses, cords or rope.

- Made from UV resistant, heavy duty, transportation grade rubber
- Each clamp supports a safe working load of 23kg
- Holds objects 13mm 114mm in diameter
- Mounts with 2 x 6mm bolts or #14 wood or sheet metal screws, plus washers

FIXED WAND FIRE DRIP TORCH

The Surefire Fixed Wand Fire Lighter is an excellent tool for burning out and fire line ignition.

The Surefire has a wand manufactured from 12mm stainless steel tube and a fibreglass filled wick covered with galvanised perforated steel sheeting.

Due to the Surefire being fitted with an anti-flash loop and non-return valves, its safety is second to none.

- Runs on 25% Petrol (Gasoline) and 75% Diesel
- 4.5 Litre Capacity
- 12mm stainless steel tube and a fibreglass filled wick covered with galvanised perforated steel sheeting
- Shamrock green in line with AFAC approved colouring for fuel storage containers

GENFO FIREFIGHTING BACKPACK

GENFO is a collapsible bushfire knapsack designed to assist firefighters approaching wildland fires

- Holds up to 18 litres of water
- Thermally welded flexible tank manufactured in canvas reinforced with synthetic fabric
- Ideal for mop-up, control and extinguishing tasks for forest fires
- Measures 490 x 650mm
- Adjustable Nozzle (Jet / Fog)
- Reach: Jet: > 8m / Fog: > 3m
- Pistol grip trigger
- Flow: 120cc/stroke
- Inlet: 100mm Diameter
- Carry via central handle and back straps

GENERAL DUTY RESCUE DUMMY

The General Duty dummies are ideally suited for almost any land rescue situation. They have anatomically correct weight distribution and the uncanny 'feel' of an unconscious patient.

The General Duty dummy can be used in more extreme rescue scenarios such as hazmat, foul drain, sewer or other toxic situations.

- Body constructed from heavy duty polyester with all seams double stitched. High density polypropylene webbing provides extra strength and durability
- Protective overalls keep the dummy clean, and greatly increases the lifespan. The overalls are made of tough polyester material

Dummies 20kg and over are supplied complete with gum boots

- Anatomically correct weight distribution to give the 'feel' of an unconscious casualty
- The shaped head allows the fitting of all types of immobilisation collars.
- General Duty dummies can safely be used in scenarios with temperatures up to 100°C.
- Ideal for wet or dry rescue conditions
- Easy clean hose down and hang dry
- Made in Britain

General Duty dummies should not be exposed to excessive temperatures (over 100°C) or naked flame. Not suitable for submersion in water. Please ask about other ranges of LifeTec manikins available for your specific application.

FIRE HOUSE RESCUE DUMMY

LifeTec manikins are designed to represent the correct anatomic weight distribution of a real person.

The fire house rescue dummy is available in several different options to mimic a real life situation and will withstand temperatures of around 160°C at floor level.

- Body constructed from the same flame retardant Polyester reinforced with 38mm Nomex® webbing
- Protective overalls are non-flammable; constructed from a special Nomex[®] blend material and reinforced with Nomex[®] webbing to improve abrasion resistance

Fitted with 20mm Kevlar $^{\odot}$ ties, as standard Velcro fastenings melt at high temperature

- Anatomically correct weight distribution to give the 'feel' of an unconscious casualty.
- Tough enough to withstand being buried under concrete or steel lintels
- Soft body joints eliminate the risk of pinch welts and bruising; common injuries when using plastic bodied manikins.
- An immobilisation/extrication collar can be fitted around the neck of our adult manikins to promote proper casualty care.
- Supplied with overalls, boots and separate Nomex[®] hood to cover the head, which are easily replaced if damaged.
- Made in Britain

AC HOT STICK

The AC Hot Stick is a safety device designed for professional rescuers which provides warning of exposed high voltage AC from a safe distance. Hot Stick will give early audible and visual warning signalling dangerous voltages without the need to contact the surface carrying the current.

- Provides early warning that high voltage AC is nearby
- Safe and simple to use
- Exceptionally sensitive
- Warnings delivered by beeping and flashing LED's (audio and visual)
 Warning signals speed up when approaching the hazard
- Affordable and reliable
- Compact and portable
 - Powered by 4 x AA alkaline batteries
- A great resource for search & rescue, fire, vehicular extrication, confined space rescue, Hazmat, disaster operations, power restoration, industrial work, trench rescue and law enforcement

HOOLIGAN TOOLS

Hooligan (halligan type) tools are traditionally used in forcible entry situations. These heavy-duty tools were designed to pound, puncture, pry, twist, and cut all types of barriers encountered by emergency service personnel.

- Head and claw are forged from heat treated, high alloy steel
- Body is a stress proof bar
- The bar is machine grooved to create a non-slip grip
- The pike is long, sharp, tapered and gently curved to fit a lock or latch
- The duckbill is long with a smooth incline to force windows and doors
- 750mm total length
- Machine sharpened claws
- Claw opening is parallel and fits over locks, hasps and many door bars
- Available with standard or metal cutting claw end

PRODUCT SPECIFICATIONS		
Product Code	M22-000600 Standard claw end	M22-000622 Metal cutting claw end

FIBREGLASS HD BAR

This tool is used mainly where forcible entry is required.

The non-conductive handle makes it a great solution for electrified or non-electrified situations.

- Head and claw are forged from heat treated, high alloy steel
- 750mm total length
- Claw opening is parallel and fits over locks, hasps and many door bars
- The pike is long, sharp, tapered and gently curved to fit a lock or latch
- The duckbill is long with a smooth incline to force windows and doors
- 750mm total length
- Machine sharpened claws
- Non-conductive fibreglass shaft
- No-slip celtex grips
- Ideal for Hybrid automobiles

SMALL TRAFFIC CONE

Traffic Cones are a great way to make a workplace, road or public area safe from dangers, hazards and lane closures.

- Robust PVC construction
- High visibility fluro body colour
- 150mm reflective collar made from Reflexite
- Rubber base measuring 26.5cm x 26.5cm with feet
- Weight: 1.4kg
- 450mm high

LARGE TRAFFIC CONE

Pac Fire's large traffic cones are generally used on roads or footpaths to temporarily redirect traffic in a safe manner, can create separation or merge lanes during road construction projects or automobile accidents.

- Robust PVC construction
- High visibility fluro body colour
- 250mm reflective collar made from Reflexite
- Rubber base measuring 26.5cm x 26.5cm with feet
- Weight: 3.25kg
- 700mm high

RUBBER WHEEL CHOCK

Wheel chocks are a must-have for any loading dock environment.

This moulded rubber wheel chock is sloped to increase holding capacity.

- Manufactured from moulded rubber
- Durable construction resists tearing, abrasion and weathering
- Meets OSHA requirements
- Includes rope strap
- Dimensions: 260mm x 160mm x 190mm
- Weight: 3.0kg

FAST & EASY ON THE SCENE CLEAN

Responder Wipes[®] have been designed and formulated specifically to meet firefighters unique needs.

Infused with Micellar Water, the wipes effectively clean dirt, oil, soot and other hydrocarbons from the skin. Micelles not only removes toxins and contaminants but also returns much needed hydration to the skin that is lost while working in hot and demanding conditions.

Their convenient packaging options reduce waste and makes Responder Wipes® perfect for use while still attending an incident.

LIFE LINERS PARTICULATE BLOCKING FLASH HOOD

The Life Liners particulate blocking flash hood is designed to deliver both comfort and protection while blocking potentially harmful carcinogens from entering the body via absorption through the skin.

- Two piece design with 15cm front with 20cm back
- Separate head with sewn on back and front bib. Back of head ends at the nape of the neck for improved fit and comfort
- Easy-Seal Face opening that goes on easy and seals tight.
- 100% Nomex[®] thread
- Outer Layer Fabric: 49% Kermel / 49% Lenzing FR/ 2% Spandex Inner Layer Fabric: Stedair Prevent
- All head and bib seams are sewn with a flat lock stitch
- 3.8cm binding sewn to hem through folder with a three thread cover stitch to create a 1.25cm finished bound hem

WHAT IS PAC+CARE?

INTRODUCING PAC+CARE

Australian federal and territory legislation requires fire and emergency services to safeguard the health and safety of their employees at work. This is enshrined in Australian Workplace Health and Safety and Occupational Health and Safety regulations. Agencies have a responsibility to supply their employees with Personal Protective Equipment and Clothing which meets all the necessary standards and performance requirements, have in place systems which ensure that personal protection is regularly monitored, inspected and maintained, and is fit for purpose throughout its operational life.

Pac Fire Australia's Managed Service, PAC+CARE, is designed to provide a comprehensive and integrated outsourced facility for agencies through which Australian Workplace Health and Safety (WHS) and Occupational Health and Safety (OH&S) regulations are met.

PAC+CARE's flagship centre is based in Yatala Queensland. Here, trained staff are allocated to the provision of care for the lifetime of customer's protective equipment and clothing and armed with the most up-to-date knowledge and resources to ensure that PPE/C worn by agencies is fully maintained for operational purpose while achieving optimum longevity.

Soiled PPE reduces insulation and is more likely to conduct heat and electricity. This can result in PPE becoming flammable. Contaminants and particulates accumulated on PPE can also negatively impact firefighter health.

SECURE DISPOSAL

ADVANCED WASH

PAC+CARE's Advanced Wash and Decontamination programs, detergents and procedures are certified NFPA 1851: 2014 compliant and certified by Bristol Uniforms and Pacific Helmets. PAC+CARE utilizes best practice methodology, state of the art cleaning and filtration technology to ensure materials and componentry are not damaged throughout the cleaning process while ensuring a sustainable environmental footprint.

ADVANCED INSPECTION

The Advanced Inspection is to ensure that protective clothing and equipment remains fit for purpose throughout its operational life. Our Advanced Inspections are in line with NFPA 1851:2014, the manufacturers SOPs for inspection, and are always carried out by a trained professionals. All serviced equipment and clothing is issued with a PAC+CARE Fit For Purpose Certificate, while the item's status is recorded on the PAC+CARE laundry software system, Bundle Connect.

REPAIR

Carrying out repairs is a key part of ensuring personal protection remains fit for purpose and compliant with the standard it was manufactured to while early damage detection if acted upon, will ultimately increase the longevity of PPE. PAC+CARE is an NFPA 1851:2014 approved Independent Service Provider certified by Bristol Uniforms and Pacific Helmets. All repairs are carried out in accordance with their construction methods, using original componentry and to a quality and standard our manufacturers deem fit.

CONDITIONAL CODING

After a repair is carried out, each item of personal protection is subject to an assessment of its condition, and ultimately when it should be retired from service.

SECURE & SAFE DISPOSITION

In the event that protective clothing or equipment is assessed as unfit for purpose, it will follow the NFPA 1851:2014 compliant pathway for secure and safe disposition of PPC/E which involves:

- The item being tagged for disposal
- The item will be destroyed in a secure environmentally sensitive method
- Certificate of Destruction issued and information logged on Bundle Connect

TRACK & TRACE

PAC+CARE provides an effective secure tracking solution which includes the ability to track each item of personal protection including:

- Specification (manufacturer, delivery date, batch number
- Service history (date of issue, name of wearer)
- Information relating to care including cleaning, decontamination, storage
- Records of maintenance including inspection, damage, repair and disposal
- Difficulties arising from the use of the equipment and/ or clothing
- Retrofitting of RFID and/or bar code

PAC+CARE

SIZING OF PERSONNEL

The correct fit is an essential component in ensuring firefighters experience optimum protection, mobility and comfort when wearing their structural ensemble. PAC+CARE offers sizing and measuring support including sizing sets, user friendly documentation to capture accurate fits for helmets, flash hoods, gloves, firefighting clothing and footwear. Trained PAC+CARE personnel are available to visit agencies locations and provide a comprehensive measuring service.

PROFESSIONAL DEVELOPMENT

Agencies can access a wealth of information, instruction and training which includes:

- PPE/C limitations in use
- Donning and Doffing
- How it should be worn
- Care and Maintenance
- Procedures for emergency replacement
- Procedures for advanced cleaning

- Repair process
- Contact points and details
- Firefighter awareness of appropriate compatibility of all elements
- Support with design and implementation or routine inspection

ESTABLISHING ON STATION CLEANING SYSTEM

PAC+CARE provides a range of options for local routine washing and drying which include:

- Washing machines
- Dryers
- Drying cabinets
- Detergents and Pre-Treatments
- Storage Solutions
- PPE Baths
